## **Schedule Your Visits**

In the app, you can accept visits by completing just four easy steps. When a referral comes in, **Snap Health will send a push notification right to your home screen.**

Once this notification comes in, **follow these steps:**

### **01** *Click on the notification on your home screen*

This screen allows you to see which home health agency submitted the referral, the location of the referral, patient information, etc.

### **02** *Click 'Referral Response'*

When referral response is clicked, you have the option to accept or deny the request and to send a message to the home health agency who submitted the referral.

### **03** *Select the day you would like to schedule the visit and click 'Set Visit Day'*

Once the visit day has been selected, you can view all of the visit detail on one convenient screen: patient name, address, phone number, diagnosis, etc. You can also request patient visit confirmation or notify the patient you are on the way via text or phone call.

### **04** *Get ready for your visit!*

**Congratulations**, you have just accepted your first visit through Snap Health!
